Space Fortress

FORTRESS COMMAND TO VIPER PILOT

Defend Space Fortress number 53 from the dreaded Dromex Empire. A fight to the death is inevitable – they have no prisoners. They aim to capture your fortress and turn your own interceptor to dust. You may not be able to stop the fleet of "viper" capsule of intermediate speed and maneuverability, armed with the latest laser weaponry.

The Fortress is capable of withstanding constant direct enemy hits, before disintegration. Given time its capacitors can disipate the energy inflicted by the dromex, a computer supplies up-to-the-minute information on all excess hull energy – your constant interception is the last defence against the disintegration of the hull.

Quickly, Dromex drones fire support craft of the Dromex Empire. Beware of the disintegrating bolt behind by the drone. These will neither capture nor destroy you but pack a lasting sting...

From dust to number 5 our General is possible if you defeat the dromex.
